Sequence 8, Application US/08973462B
Patent No. 6191270
GENERAL INFORMATION:
APPLICANT: DAUBERSIES, PIERRE
APPLICANT: DAUBERSIES, PIERRE
TITLE OF INVENTION: MALARIAL PRE-ERYTHROCYTIC STATILE REFERENCE: 0660-0125-0 PCT
CURRENT APPLICATION NUMBER: US/08/973,462B
CURRENT FILING DATE: 1998-02-06
EARLIER APPLICATION NUMBER: PCT/FR96/00894
EARLIER APPLICATION NUMBER: FCT/FR96/00894
EARLIER APPLICATION NUMBER: FCT/FR96/00707
EARLIER APPLICATION NUMBER: FCT/FR96/0071
EARLIER APPLICATION NUMBER: FCT/FR96/00894
US-09-308-375-2
, Sequence 2, Application US/09308375
, Patent No. 6300117
, GENERAL INFORMATION:
, APPLICANT: Genencor International,
, TITLE OF INVENTION: Proteases From
, FILE REFERENCE: GC394-PCT
                                                                                                                                                                                                                                                                                                                                                                                       뮻
                                                                                                                                                                                                                                                                                                                                                                                                                                       Ş
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                밁
